

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (previously presented) In a distributed network, a method for automatically synchronizing each of a set of distributed multimedia assets, comprising:

- (a) modifying a particular one of the set of distributed multimedia assets; and
- (b) automatically synchronizing all others of the set of distributed multimedia assets based upon (a).

2. (original) A method as recited in claim 1, further comprising:

- (c) generating an update edit list corresponding to (a).

3. (original) A method as recited in claim 2, wherein the automatically synchronizing comprises:

- (d) forwarding the update edit list to the others of the set of distributed multimedia assets; and
- (e) modifying each of the others of the set of distributed multimedia assets based upon the forwarded update edit list.

4. (original) A method as recited in claim 1, further comprising:

- (f) generating a resultant multimedia asset corresponding to (a), wherein the resultant multimedia asset is formed of a digital negative of the particular one of the set of multimedia assets and a corresponding edit list, wherein the edit list represents all modifications made to the digital negative.

5. (original) A method as recited in claim 4, wherein the automatically synchronizing comprises:

- (g) replacing each of the others of the set of distributed multimedia assets with the resultant multimedia asset.

6. (original) A method as recited in claim 1, wherein the multimedia asset is a digital image.

7. (original) A method as recited in claim 6, wherein the digital image is one of a plurality of associated digital images.

8. (original) A method as recited in claim 7, wherein the plurality of associated digital images take the form of an album.

9. (original) A method as recited in claim 1, wherein the edit list is one of a number of edit lists included in a catalog file.

10. (original) A method as recited in claim 9, where each of the number of edit lists included in the catalog file are associated with a particular multimedia asset.

11. (previously presented) In a distributed network, an apparatus for automatically synchronizing each of a set of distributed multimedia assets, comprising:

a first means for modifying a particular one of the set of distributed multimedia assets; and

a second means for automatically synchronizing others of the set of distributed multimedia assets based upon the modifying of the first means.

12. (previously presented) In a distributed network, an apparatus as recited in claim 11, further comprising:

a third means for generating an update edit list based upon the modifying of the first means.

13. (original) In a distributed network, an apparatus as recited in claim 12, wherein the automatically synchronizing comprises:

a fourth means coupled to the third means for forwarding the update edit list to the others of the set of distributed multimedia assets; and

a fifth means coupled to the fourth means for modifying each of the others of the set of distributed multimedia assets based upon the forwarded update edit list.

14. (original) In a distributed network, an apparatus as recited in claim 11, further comprising:

a sixth means coupled to the first means for generating a resultant image corresponding to the modified multimedia asset wherein the resultant image is formed of a digital negative of the particular one of the set of multimedia assets and a corresponding full edit list, wherein the full edit list represents all modifications made to the digital negative.

15. (original) In a distributed network, an apparatus as recited in claim 12, wherein the automatically synchronizing comprises:

a seventh means coupled to the first means for replacing each of the others of the set of distributed multimedia assets with the resultant image.

16. (original) In a distributed network, an apparatus as recited in claim 12, wherein the multimedia asset is a digital image.

17. (original) In a distributed network, an apparatus as recited in claim 16, wherein the digital image is one of a plurality of associated digital images.

18. (original) In a distributed network, an apparatus as recited in claim 17, wherein the plurality of associated digital images take the form of an album.
